PROFESSIONAL SUMMARY

Data Analyst with 2+ years of practical experience in the field of turning complex data into useful and actionable insights, seeking full-time data analyst role.

WORK EXPERIENCE

- Data Analyst | Freelance & Academic Projects**

Jan 2022 - Present

 - Developed real-time cryptocurrency dashboards using Airflow, Kafka, Snowflake, and Power BI.
 - Created a SQL Server data warehouse using the Medallion Architecture and designed analytical tables.
 - Built automated ETL pipelines to load structured and semi-structured data from AWS S3 to Snowflake.
 - I am also earning AWS Data Engineer Associate certification to strengthen my knowledge of the cloud.
- MultiChoice | Data Analyst (Part-Time)**

May 2024 - Oct 2024

 - Automated reporting operations and ETL pipelines, reducing report turnaround time by 10%.
 - Conducted trend analysis and built dashboards that reduced refund processing time by 5%.
 - Partnered with finance and operations teams to increase data transparency.
 - Contributed to efforts to transform data into business-strategic action with business stakeholders.
- Safra Data | Big Data Engineer Intern**

May 2023 - Sept 2023

 - Automated quality checks of data in Python which increased the accuracy of the datasets by 15%.
 - Optimized Airflow Dags by tuning SQL queries cutting job time by 25%.
 - Made contributions to scaling improvement of pipelines in partitioning and caching.

PROJECTS [CLICK TO VIEW MY PROJECTS](#)

- Cryptocurrency Data Pipeline Dashboard**

| **Tools:** Python, SQL, Docker, AWS S3, Snowflake, Power Bi

 - Developed a full data ingestion pipeline and Lakehouse-style architecture (Bronze, Silver, Gold).
 - Created fact and dimension tables, resulting in a 30% improvement in analytics efficiency for reporting.
 - Ingested live crypto data into S3, transformed with SQL and Python in Snowflake.
 - Designed Power BI dashboards for traders to visualize real-time prices and trends.
- SQL Server Data Warehousing & Analytics**

| **Tools:** SQL Server, Power Bi

 - Automated reporting operations, resulting in a saving in the average turnaround time of 10%.
 - Analyzed the relevant data and utilized Power BI dashboards to improve the workflow of refund decisions by 5%.
 - Designed fact and dimension tables to support efficient reporting and analysis.
 - Contributed to efforts to transform data into business-strategic action with business stakeholders.
- Amazon S3 to Snowflake ETL with Airflow**

| **Tools:** S3, Snowflake, Apache Airflow, SQL, Python, Power Bi

 - Built modular ETL pipelines using Airflow with XComs, Hooks, branching, and trigger rules.
 - Orchestrated FX/product data ingestion from S3 to Snowflake using custom Airflow operators.
 - Enabled automated reporting via Power BI dashboards integrated with Snowflake views.
 - Enabled automated loading and transformation of FX and product data, streamlining finance reporting processes.

EDUCATION

- Bachelor of Science in Applied Statistics with Programming**

Sep 2020 - April 2024

Murang'a University of Technology

 - Relevant Coursework: Time Series Analysis, Database Systems (SQL), Python & R Programming, Data Visualization & Reporting.

ADDITIONAL INFORMATION

- **Technical Skills:** Python, SQL, Shell, Power BI, Spreadsheet, Apache Airflow, Apache Kafka, Spark, Databricks, Medallion Architecture, Snowflake, SQL Server, PostgreSQL, AWS (S3, EC2, IAM), Docker, React, Vite, Tailwind
- **Soft Skills:** Stakeholder communication, ETL documentation, problem-solving, collaborative execution
- **Certifications:** IBM Data Analysis with Python (2023), Python Programming (2022), AWS Certified Data Engineer – Associate (in progress)
