EDUCATION

Murang'a University of Technology

September 2020 - April 2024

Bachelor of Science - Applied Statistics with Programming

Murang'a, Kenya

- Relevant Coursework: Probability Theory, Programming in Python & R, Data Visualization & Reporting

SKILLS SUMMARY

- Expertise in building scalable ETL pipelines using Hadoop, Apache Airflow, Kafka, and Spark on Databricks, AWS, and Oracle.
- Skilled in Data Build Tool for modeling, warehousing with Snowflake, and applying Medallion Architecture for data governance.
- Proficient in Python, SQL, R and Shell scripting, with strong experience in PostgreSQL and SQL Server.
- Experienced in containerization via Docker and developing modern web applications using React, Vite, and Tailwind CSS.
- Adept at stakeholder collaboration, communication, documentation, and delivering end-to-end data and application solutions.

WORK EXPERIENCE

BUSINESS DATA ANALYST | MultiChoice

May 2024 - September 2024

- Achieved 10% reduction in average turnaround time via ETL pipeline automation.
- Organized installers data, cleaned and transformed them for migrations to a new system, I facilitated the process which saved 20% of the time that it was to take.
- Reduced refund processing time by 5% through data-driven strategies.

Big Data Engineer Intern | Safra Data |

April 2023 - August 2023

- Automated data profiling and quality checks in Python where I implemented medallion architecture, improving accuracy by 15% and reducing processing time by 25%.
- Enhanced SQL queries and Airflow Dags (bucketing, salting, partitioning, caching), leading to a 5% increase in job efficiency.

PROJECTS

INDEPENDENT PROJECTS | [PORTFOLIO LINK](#)

2022 - Present

- Designing and deploying scalable data pipelines using Kafka, Data Build Tool, Airflow, Snowflake, and AWS (S3, SNS), enabling both real-time and batch processing with 95% reliability.
- Developing data pipelines on Oracle Cloud Infrastructure, utilizing Oracle Object Storage and Autonomous Data Warehouse to expand multi-cloud engineering capabilities.

Crypto Currency Data Pipeline | [LINK](#)

- Developed a real-time crypto data pipeline using Apache Kafka and orchestrated ingestion with Airflow, reducing data latency by 15% and enabling timely market trend monitoring.
- Cleaned and transformed real-time data using SQL and Python in Snowflake following Medallion Architecture, improving dashboard refresh speed by 10% and ensuring high data accuracy.
- Designed Power BI dashboards on top of curated Snowflake data, reducing report turnaround time from hours to minutes and enabling real-time crypto market trend analysis.

End-to-End Data Modernization | [LINK](#)

- Designed and implemented a custom ETL pipeline to ingest structured data into SQL Server, reducing manual integration efforts by 20% and enabling faster access to centralized, clean datasets for analytics.
- Implemented Medallion Architecture (Bronze, Silver, Gold layers) in SQL Server to enhance data governance and reusability, reducing reporting development time by 20%. Ingested and warehoused structured data into SQL Server using custom ETL pipeline.
- Modeled optimized star schema (fact/dimension tables) and delivered SQL-based Power BI dashboards, reducing reporting lag by 15% and enabling faster decision-making across departments.

Airflow Data Engineering Pipeline Orchestration | [LINK](#)

- Automated ingestion of FX and product datasets from Amazon S3 using Airflow DAGs, increasing data availability by 95% and eliminating manual handoffs.
- Leveraged Snowflake external stages and SQL scripts to transform and load S3 data, reducing processing time by 30% and ensuring clean, analytics-ready outputs.
- Engineered robust orchestration using Airflow features like XComs, branching, custom operators, and trigger rules, achieving 99% task reliability and scalable modular design.
- Designed fault-tolerant Airflow DAGs with retries, conditional logic, and modular components, reducing pipeline downtime by 85% and ensuring consistent data delivery.

CERTIFICATIONS

- Programming in Python (Computer Pride) | [CERTIFICATE](#)
- Oracle Cloud Infrastructure 2025 Certified Foundations Associate | [CERTIFICATE](#) | [BADGE](#)
- Oracle Data Platform 2025 Certified Foundations Associate | [CERTIFICATE](#) | [BADGE](#)
- Oracle Autonomous Database Cloud 2025 Professional | [CERTIFICATE](#) | [BADGE](#)
